

HOW TO COPY CATALOG BLU-RAYS AND DVD'S

Please refer to the "Anatomy of a Blu-ray / DVD record" documents for specific MARC record structure and content. Combo Blu-ray/DVD will have two 007 fields, one for each format, and may also have double 34x fields.

Things that should match – if these things don't match find a different record:

Title (obviously! But it's an easy thing to forget to check closely and it's the main access point!)

Year (in both fixed fields and 264c)

Number of discs

Language tracks

Runtime (both in Time fixed field and in parentheses in the 300a)

Edition (director's cut, theatrical release, anniversary edition etc.)

Widescreen or fullscreen (if noted)

Bonus features or special features

Feature films:

Every actor, director etc. listed on the liner is in a 700 field.

Any questions about MARC fields?
